

L.B. KANUSHKA THEJAN

+94 76 876 4682 | kanushkathejan123@gmail.com | linkedin.com/in/kanushka-thejan | github.com/kanushka-thejan | Kalutara, Sri Lanka

PROFESSIONAL SUMMARY

ICT undergraduate with hands-on experience across full-stack software development and data analysis. Skilled in building end-to-end web applications with React.js, Django, and FastAPI, as well as performing exploratory data analysis and building dashboards using Python, Pandas, and Power BI. Comfortable working across the stack — from designing REST APIs and databases to visualizing data-driven insights. Seeking a Software Engineering / Data Analyst internship to apply technical and analytical skills while contributing to real-world products.

EDUCATION

University of Vavuniya — Bachelor of Information and Communication Technology (Hons)

2023 – 2027

TECHNICAL SKILLS

Languages	Python, JavaScript, PHP, Java, C++, C, C#, SQL, R
Frontend	React.js, Vite, CSS
Backend	Django, Django REST Framework, FastAPI, Flask, REST APIs
Databases	MySQL, Firebase, MongoDB
Data Analysis	Pandas, NumPy, Matplotlib, Seaborn, EDA
BI & Tools	Power BI, Excel, Git, VS Code, JWT

KEY PROJECTS

Retail Sales Analytics Platform (2026) | *React.js, Vite, Django, Django REST Framework, Python, SQL, JWT*

Built a full-stack web application to help businesses monitor and analyze sales, products, customers, inventory and overall performance, featuring a business performance dashboard, sales forecasting, product & inventory management, customer analysis, financial reporting, POS and sales history management, and JWT-based user authentication.

Sales Analysis Dashboard (2026) | *Python, Pandas, NumPy, Matplotlib, Seaborn, Power BI*

Built an interactive dashboard to analyze sales, profit, customer and product performance, enabling data-driven business insights.

Crypto Dashboard (2026) | *React.js, FastAPI, CSS*

Developed a full-stack dashboard displaying live cryptocurrency prices with interactive charts, price alerts, favorite coins and user authentication.

Customer Churn Analysis (2025) | *Python, Pandas, NumPy, Matplotlib, Seaborn*

Performed exploratory data analysis on customer churn data, visualized key trends and identified factors affecting customer retention.

Phone Location Tracker (2025) | *Python, phonenumbers, geocoder, folium*

Built a tool that detects a phone number's approximate location and displays it on an interactive map.

CERTIFICATIONS

- Python Programming — University of Moratuwa (2025)
- Data Science Essentials with Python — Cisco Networking Academy (2026)
- Introduction to Data Analytics — Coursera (2025)
- Excel for Data Analysis — Coursera (2026)
- Python for Beginners — Simplilearn (2025)
- Python for Beginners — University of Moratuwa (2025)
- Intro to Programming — Kaggle (2025)
